AAC 'L' ITEM NSN 6520-01-481-9086

UAs: 271A

USAMMA POC: Customer Relationship Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$424.35

System Description: The patented "Accumount" Mounting System makes it possible to exchange mounted casts between any Model 2240 or any Model 2340 Articulator without loss of accuracy. During manufacture, each Articulator has a special table firmly and precisely attached to the lower frame using a special fixture and low fusing alloy.

Features:

- Users can transfer mounted casts without loss of accuracy.
- Mounted casts need no longer be sent on an articulator when shipped to or from a laboratory using the same articulator model.
- Reduces the number of instruments required in both the dental office and dental laboratory.
- Instrument damage caused by shipping the articulator to and from the dental lab is eliminated.
- Interframe spacing of over 4 inches allows easy mounting of even the bulkiest casts.
- Rounded edges and frame corners for enhanced visibility and posterior access.
- Bilateral elastics provide optimum feel during excursive movements and can be easily detached to remove the upper frame.
- Quick-acting centric lock allows easy return of the articulator to centric position and simple hinge movement.
- Upper frame can easily be set at an open position for convenience during laboratory procedures.
- Condylar guidance featuring:
 - Adjustable condylar inclination with curved eminentia.
 - Immediate side shift.
 - Fixed intercondylar distance of 110 mm.
